Clear pricing, no surprises

Ontario, California | 2026 commercial edition | Prices in USD

Initial development

You pay us to design, set up, and launch your website.

Platform and third-party services

Your church pays the provider directly for Wix or WordPress hosting and its domain. Premium plugins (additional tools) and donation processing fees are also separate. Costs depend on the provider and plan you choose.

Website management and maintenance

You can hire us to help keep your website up to date. This is optional with Wix; WordPress maintenance is contracted according to the package. Each plan explains the services and monthly content update hours included.

Web Development Terms

Ontario, California | 2026 commercial edition | Prices in USD

Payment terms

Pay 50% to get started. The remaining 50% is due before your website goes live.

Website ownership

Your church owns its domain, accounts, and content. Third-party licenses and restricted assets remain subject to their own terms.

Revisions

We include two rounds of revisions within the agreed scope. For each round, send us a list of changes to the agreed work.

Materials and timelines

Delivery timelines begin once you provide the required information, photos, logos, and account access. All timelines are estimates.

Additional changes

If you need work outside the agreed scope, we provide a separate quote first.

Maintenance

Maintenance plans require an initial three-month commitment. After that, you may renew month to month under the contract terms.

Donations

Donation processing accounts must belong to your church. Zamaluni does not receive or manage donated funds. Your church is responsible for processing fees. Receipts and tax treatment depend on your organization's status and the tool used; automatic tax deductibility is not promised.

Availability

We monitor your website and provide support according to your package. This service does not guarantee 100% website availability.

Languages

We include translation and setup in English and Spanish for the content agreed upon during initial development. Translation of new content added later is quoted separately.

Complete Ministry scope

The members area includes initial setup using existing tools; it does not include building a custom system from scratch. Advanced integrations, special automations, and custom development are quoted separately.
